

About us

We are a technological innovation enterprise focused on generating knowledge and technology for Brazilian agriculture.

The Brazilian Agricultural Research Corporation (Embrapa) was founded on April 26, 1973, and is under the aegis of the Brazilian Ministry of Agriculture, Livestock, and Food Supply.

Since our foundation, and with our partners from the National Agricultural Research System, we have taken on the challenge to develop a genuinely Brazilian model of tropical agriculture and livestock to overcome the barriers that limited the production of food, fiber, and fuel in our country.
